

PALOMA DE LA HOZ RODRÍGUEZ

Game design-Narrative design-Level design

ABOUT ME

I'm a Game designer.

I studied a master's degree in Game Design at the U-tad University in Madrid, creating my first vertical; Not my War: A stealth and exploration game with an isometric camera.

My speciality is **narrative**, and I have also been able to learn about other areas such as **level design** (Coordinating and planning the validation of encounters in the game).

I studied emergency medical services and worked in a casino as a croupier; shortly afterwards, I discovered that I could work in a field I am passionate about: video games.

I began studying on my own until I was finally able to complete a master's degree in Game Design at U-tad University in Madrid.
